April 23, 2020

Iowa Governor Kim Reynolds  
State Capitol  
1007 E Grand Ave #101  
Des Moines, IA 50319

Dear Gov. Reynolds,

On behalf of the Law Enforcement Action Partnership (LEAP), we write to express our appreciation for the Iowa Parole Board's action to reduce the spread of COVID-19 throughout Iowa's correctional facilities by [approving over 100 early releases](#). Having served in Iowa law enforcement, we ask that you **immediately issue an executive order to further reduce incarceration and improve health standards in correctional facilities**. An easily adaptable sample [executive order](#) is attached to illustrate our recommendations.

Public support for dramatically reducing jail and prison populations to slow the spread of the coronavirus is strong. **Sixty-six percent of likely voters, including 59% of those who identify as "very conservative," said that elected officials should consider measures to reduce populations in prisons and jails as a response to coronavirus.**<sup>1</sup> Criminal justice leaders are already taking action to safely reduce correctional populations.<sup>2</sup>

We write to you as the sole actor with the authority to achieve system-level results with clarity, consistency, and vision. We suggest you take the following steps right now to prevent the spread of COVID-19 in correctional facilities and beyond:

1. **Release medically high-risk people in state custodial facilities.** We urge you to use your clemency powers to begin a process of immediate review and presumptive release for all people identified by the CDC as particularly at-risk – older people and people with underlying health conditions or who are otherwise immune-compromised – whose sentences would end in the next two years and who do not pose a significant public safety risk.

---

2. **Reduce overall populations in state custodial facilities.** Using your clemency powers, begin a process of immediate review and presumptive release for:
  - a. anyone incarcerated for technical violations of probation or parole, and/or
  - b. anyone whose sentence would end in the next 180 days.
  
3. **Reduce medically high-risk and overall populations in local custodial facilities.** Direct local stakeholders, including police, prosecutors, and judges, to take concrete steps to reduce the intake of people into local custodial facilities. These steps would include:
  - a. stopping arrests for low-level offenses and issuing citations in lieu of arrest for other offenses,
  - b. suspending the use of cash bail and limiting pretrial detention to cases with a significant risk of flight or charges indicating high risk of violent reoffending, and
  - c. setting conditions of release that allow incarcerated people to care for family at risk for COVID-19.

It is challenging for local jurisdictions to respond effectively to this crisis, since it requires so many different agencies to coordinate. The justice system needs state-level guidance from your office in order to act swiftly, properly allocate resources, and minimize casualties. The coronavirus pandemic is testing every one of our institutions. Elected officials and other stakeholders who make the right decisions right now - when it matters most - will be remembered for their bravery, wisdom, and foresight.

Below is a draft [executive order that you could adapt to immediately address this crisis](#). Thank you for your time and leadership.

Sincerely,

Officer Brian Gaughan (Ret.)  
Eleven-year Davenport Police Officer

Brian Leininger  
Assistant District Attorney (Fmr.)
